

# EPV NIGHT OUT

Lighting: Economy or safety, why choose?

**EPV NIGHT OUT** allows to turn off your public lighting in the middle of the night

The safety of your city remains assured

Public lighting reassures the inhabitants of our cities and has proven its effectiveness in reducing insecurity. However, today to save energy and reduce light pollution, many municipalities have decided to switch off public lighting in the middle of the night. Thanks to its design, **EPV NIGHT OUT** recharges very quickly and keeps your video protection fully operational.

**EPVIDEO** is a range of products designed to power the city's connected objects from public lighting. Thanks to its battery, recharged at night in the presence of lighting, **EPVIDEO** connects cameras, transmitters or other IP objects, protects them and powers them 24 hours a day.

## FEATURES

- ~ Oversized battery
- ~ Ultra high-speed charger
- ~ Supplies 4 cameras or equipment with PoE
- ~ A few hours of public lighting is enough
- ~ Keeps equipment operational 24 hours a day

## BENEFITS

- ~ Designed for public lighting extinction
- ~ Works with energy savers
- ~ Easy pole mounting
- ~ Shelters third party equipment
- ~ Supplied with certificate of associativity
