

Associativity Video Study

Your needs are changing, maintain the reliability of your installation!

- You want to switch off street lighting at particular times
- You install more effective videoprotection cameras
- You add a local video stream recorder
- You want to power wifi terminals on the existing EPVIDEO
- You want a guarantee of operation for several years

The Associativity Video study will determine the EPVIDEO you need

FUNCTIONS

- ~ Use of experience-based software to recalculate the installation.
- ~ The software takes into account the city's geographical position to determine the exact night-time hours.
- ~ Precise timetables for switching street lighting on and off optimise the solution.
- ~ The calculation is based on the equipment of your installation as you foresee it for your city.
- ~ It is based on an equipment database containing more than 3,000 cameras, transmitters, switches, etc. commonly used in our business. The theoretical and actual consumption of the equipment are confirmed in our laboratories.
- ~ Several usage scenarios are taken into account: pre-heating, IR projector, etc.
- ~ The simulation is based on more than 10 years' experience of the behaviour of lithium batteries as a function of temperature, ageing, etc.
- ~ A detailed report certifying that your installation is operating correctly with the recommended equipment under the desired conditions.

Your solution Thanks to a high-performance tool

A report certifies the correct operation of your system over time with the recommended equipment under the desired conditions of use.

YOUR CITY

The software takes into account your town's longitude and latitude.

YOUR NEED

Using your switch-on and switch-off schedules, the calculation selects the possible solutions and suggests the best one.

YOUR EQUIPMENT

By providing us with the equipment you use, we carry out a simulation based on actual consumption.

YOUR USE

Our study takes into account your usage scenarios: pre-heating of cameras in winter, IR spotlight at night, PTZ motorisation, additional solar panel, etc...

The Associativity Video study meets your latest needs. It guarantees that your existing equipment will operate under the desired conditions. If not, we can offer you the new EPVIDEO you need. A trade-in offer for old equipment is also available.
